INTERESTS

PROFILE

Specializing in the areas of user experience and product design I creatively solve pain points and come up with user centered design solutions that make enjoyable products.

WORK EXPERIENCE

UI AND UX DESIGNER

2017-present

Booking.com

- Making sure we deliver a holistic design experience by collaborating with other designers, user researchers, UX copywriters, data scientists and product owners.
- Presenting and communicating idea with all stakeholders involved.
- Doing qualitative and quantitative research in order to understand the pain points and come up with testable hypothesis.
- Setting up A/B tests and making data informed decisions.

PRODUCT AND UX DESIGNER

2007-2017

CallidusCloud, former Webcom.inc

- Worked closely with project managers and end users to shape the vision of new products and new features that were being developed using design thinking methodology.
- Did usability testing of each new solution to make sure we delivered best user experience.
- Communicated with clients through sales and business analyst teams in order to customize the product based on their input.
- Created a design system that helped maintain consistency across different products and different teams.
